# 1. Executive Summary

- 1.1 This document sets out Elmbridge Borough Council's (EBC's) plan period (2039/40) housing trajectory and 5-year housing land supply associated with the Council's Draft Local Plan, which was submitted to the Planning Inspectorate for Examination in August 2023.
- 1.2 The Council's supply of deliverable sites is compared against the housing requirement of 452 dwellings per annum (dpa) promoted in the Draft Plan and standard method housing requirement of 650 dpa over the 5 year period 01 April 2024 to 31 March 2029, plus the identified shortfall in 2021/22 and 2022/23 in accordance with the Sedgefield approach and a 5% buffer in accordance with paragraph 74 of the National Planning Policy Framework (NPPF)<sup>1</sup>.
- 1.3 EBC's housing trajectory and 5 year housing land supply is calculated on the basis of the following key components:
  - Sites allocated in the Draft Elmbridge Local Plan that meet the NPPF definition of deliverable or developable;
  - Major and minor developments with planning permission that meet the NPPF definition of deliverable or developable, minus a 10% non-implementation discount for small sites of less than 10 units;
  - Major development with a resolution to grant planning permission and clear evidence of deliverability;
  - Major and minor developments under construction that meet the NPPF definition of deliverable or developable; and
  - A small sites windfall allowance based on past trends.
- 1.4 These components show there is a total deliverable supply of 2,027 net dwellings over the 5 year period 01 April 2024 to 31 March 2029. As such there is a shortfall of 621 dwellings over the 5 year period against the housing requirement of 2,648 promoted in the Draft Plan and 2,077 dwellings against the standard method housing requirement of 4,103. This

<sup>&</sup>lt;sup>1</sup> As the Draft Elmbridge Local Plan was submitted in August 2023, its Examination in Public (EiP) falls under the transitional arrangements set out in Annex 1: Implementation of the NPPF published on 20 December 2023 and is being examined against the NPPF as published on 20 July 2021. As such, references to the NPPF throughout this document refer to the 2021 version of the NPPF

represents a total **3.8 years and 2.4 years of housing supply respectively** and the Council is therefore not able to demonstrate a 5 year housing supply under the housing requirement promoted in the Draft Plan or the standard method calculation of housing need.

# 2. Policy Context

## **National Planning Policy**

- 2.1 At paragraph 74, the NPPF establishes that "local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old (unless these strategic policies have been reviewed and found not to require updating... The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:
  - 5% to ensure choice and competition in the market for land; or
  - 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or
  - 20% where there has been a significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply (this is measured against the Housing Delivery Test where the test shows delivery was below 85% of the housing requirement)."
- 2.2 In the context of plan-making, Paragraph 004 (Reference ID: 68-004-20240205) of Planning Practice Guidance (PPG) on Housing Land Supply sets out that "strategic policies should identify a 5 year housing land supply from the intended date of adoption of the plan".
- 2.3 Paragraph 059 (Reference ID: 68-058-20240205) goes on to state that "in accordance with paragraph 69(a) [correct reference to 2021 NPPF is paragraph 68] of the National Planning Policy Framework, planning policies should identify a supply of specific, deliverable sites for five years following the intended date of adoption. A 5 year supply of specific, deliverable sites at the time of the conclusion of its examination is one of the criteria under paragraph 76 of the National Planning Policy Framework which a plan must meet in order for a local authority to not be required to demonstrate a 5 year housing land supply for the purposes of decision-making".

- 2.4 Demonstration of a 5-year housing land supply is a material consideration when determining applications and appeals. Paragraph 11 of the NPPF sets out that where a local planning authority cannot demonstrate a 5-year housing land supply, Local Plan policies which are most important for determining planning applications involving the provision of housing are considered out-of-date. Paragraph 11(d) states that for decision-taking this means "where there are no relevant development plan policies, or the policies which are most important for determining the application are out-of-date<sup>2</sup>, granting permission unless:
  - The application of policies in this Framework that protect areas or assets of particular importance provides a clear reason for refusing the development proposed; or
  - ii. Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole."
- 2.5 Paragraph 008 (Reference ID: 68-008-20190722) of the PPG on Housing Land Supply states that "in Plan-making the Inspector examining the plan will test the evidence to ensure that the 5 year housing land supply identified in strategic policies is sound. If it is not, wherever possible the Inspector will recommend main modifications to the plan to ensure that the plan identifies a 5 year housing land supply from its date of adoption. In decision-taking, if an authority cannot demonstrate a 5 year housing land supply, including any appropriate buffer, the presumption in favour of sustainable development will apply, as set out in paragraph 11d of the National Planning Policy Framework".

# **Local Plan Policy**

2.6 EBC submitted its Draft Local Plan to the Planning Inspectorate for Examination on 10 August 2023. The Secretary of State appointed an Inspector to undertake the Examination in Public (EiP) on 16 August 2023, with the first

<sup>&</sup>lt;sup>2</sup> **NPPF Footnote 8:** This includes, for applications involving the provision of housing, situations where the local planning authority cannot demonstrate a five year supply of deliverable housing sites (with the appropriate buffer, as set out in paragraph 74); or where the Housing Delivery Test indicates that the delivery of housing was substantially below (less than 75% of) the housing requirement over the previous three years.

<sup>&</sup>lt;sup>3</sup> Elmbridge Local Plan Examination webpage.

- hearing session taking place on 27 February 2024. The EiP was paused on 30 April 2024 and will restart on 17 June 2024.
- 2.7 Strategic Policy SS1 of the Draft Plan proposes a housing requirement of 6,785 new homes over the 15 year period 2022/23 to 2036/37 (452 dpa). Through the EiP process the Inspector has concluded that the Council's plan period must be extended to 2039/40 in order to maintain a 15 year plan period after adoption of the Draft Plan.
- 2.8 The housing trajectory and 5 year housing land supply position presented in this document is set out against both the proposed housing requirement in the Council's Draft Local Plan and the Standard Method calculation of housing need in the Borough.
- 2.9 As the Examination of the Draft Plan has not been completed and the Council's proposed housing requirement hasn't been adopted, it cannot be used as the basis for calculating a 5 year (or 4 year) housing land supply for the purposes of development management decision making.

# 3. Methodology

#### **Base Date**

- 3.1 The base date of the Draft Local Plan housing trajectory is the monitoring/financial year starting 01 April 2022, reflecting the publication date of the Draft Plan in June 2022 for the Regulation 19 consultation.
- 3.2 For the purposes of the 5 year housing land supply, a base date of the monitoring/financial year starting 01 April 2024 is used, reflecting the latest monitoring data.

## **Housing Requirement**

3.3 As set out in paragraph 2.7 above, the Council's housing land supply position is set out against both the housing requirement of 452 dpa proposed in the Council's Draft Local Plan and the standard method calculation of housing need – 650 dpa.

## **Supply Assumptions**

- 3.4 Paragraph 68 of the National Planning Policy Framework (NPPF) states that "Planning policies should identify a supply of:
  - (a) specific, deliverable sites for years one to five of the plan period<sup>4</sup>; and
  - (b) specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15 of the plan."
- 3.5 The glossary of the NPPF (Annex 2) sets out the definition of 'deliverable' and 'developable' sites as follows:

#### **Deliverable**

3.6 "To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic

<sup>&</sup>lt;sup>4</sup> **NPPF Footnote 34:** With an appropriate buffer, as set out in paragraph 74. See the Glossary in Annex 2 for the definitions of deliverable and developable.

prospect that housing will be delivered on the site within five years. In particular:

- a) Sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).
- b) Where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years."
- 3.7 Sites considered "deliverable" and are therefore included in years 1 to 5 of the Council's housing trajectory using the above definition are:
  - 1. **Sites with units under construction** at the base date unless there is clear evidence homes will not be delivered within 5 years of the base date in accordance with the definition of deliverable set out in the NPPF.
    - The best available site-specific information has been used to estimate the timeframe of completions for schemes of more than 20 units. Where it wasn't possible to obtain site specific information an estimate of completion dates and build out rates was used based on historic completions data in the Borough over the last 10 years (2022/23 – 2014/15) for sites of 10 to 49 units and Lichfields Start to Finish (Third Edition)<sup>5</sup> for sites of more than 50 units.
  - Major developments (developments of 10+ net dwellings) with planning permission unless there is clear evidence that homes will not be delivered within 5 years of the base date in accordance with the definition of deliverable set out in the NPPF.
    - Again, the best available site-specific information has been used to estimate the timeframe of completions for sites of more than 20 units but where it wasn't possible to obtain site specific information an estimate of

\_\_\_

<sup>&</sup>lt;sup>5</sup> Lichfields Start to Finish Third Edition, March 2024.

- completion dates and build out rates was used based on historic completions data in the Borough for sites of 10 to 49 units and Lichfields Start to Finish (Third Edition) for sites of more than 50 units.
- 3. Minor developments (development of less than 10 net dwellings) with planning permission but not yet under construction unless there is clear evidence that homes will not be delivered within 5 years of the base date in accordance with the definition of deliverable set out in the NPPF.
  - An estimated three years to completion from the decision date was applied to sites of less than 10 units based on historic completions data in the Borough over the last 10 years (2022/23 – 2014/15).
- 4. **Major developments with a resolution to grant** where there is clear evidence that homes will be delivered within 5 years of the base date in accordance with the definition of deliverable set out in the NPPF.
  - Again, the best available site-specific information has been used to
    estimate the timeframe of completions for sites of more than 20 units but
    where it wasn't possible to obtain site specific information an estimate of
    completion dates and build out rates was used based on historic
    completions data in the Borough for sites of 10 to 49 units and Lichfields
    Start to Finish (Third Edition) for sites of more than 50 units.
- 5. Site allocations proposed in the Draft Local Plan where there is clear evidence that homes will be delivered within 5 years of the base date in accordance with the definition of deliverable set out in the NPPF. Care has been taken to ensure proposed site allocations that have planning permission or are under construction are not double counted.
  - Again, the best available site-specific information has been used to
    estimate the timeframe of completions for sites of more than 20 units but
    where it wasn't possible to obtain site specific information an estimate of
    completion dates and build out rates was used based on historic
    completions data in the Borough for sites of 10 to 49 units and Lichfields
    Start to Finish (Third Edition) for sites of more than 50 units.
- 6. A small-sites windfall allowance of 83 dpa is applied from year 4 onwards in accordance with paragraph 71 of the NPPF. The methodology used to calculate the Council's windfall allowance is set out below under

#### **Developable**

- 3.8 "To be considered developable, sites should be in a suitable location for housing development with a reasonable prospect that they will be available and could be viably developed at the point envisaged."
- 3.9 Sites considered "developable" and are therefore included in years 6 to 10 and 11 to 15 of the Council's housing trajectory using the above definition are:
  - 1. **Proposed site allocations** where there is evidence that delivery is achievable more than 5 years from the base date in accordance with the definition of developable set out in the NPPF.
    - The best available site-specific information has been used to estimate the
      timeframe of completions for sites of more than 20 units but where it
      wasn't possible to obtain site specific information an estimate of
      completion dates and build out rates was used based on historic
      completions data in the Borough for sites of 10 to 49 units and Lichfields
      Start to Finish (Third Edition) for sites of more than 50 units.
  - 2. Sites with units under construction, Planning Permission or a Resolution to Grant where build out rates indicate homes will be delivered more than 5 years from the base date and therefore would not meet the definition of deliverable but would meet the definition of developable set out in the NPPF.
    - Again, the best available site-specific information has been used to
      estimate the timeframe of completions for sites of more than 20 units but
      where it wasn't possible to obtain site specific information an estimate of
      completion dates and build out rates was used based on historic
      completions data in the Borough for sites of 10 to 49 units and Lichfields
      Start to Finish (Third Edition) for sites of more than 50 units.
  - 3. **The small-sites windfall allowance** of 83 dpa is continued through years 6 to 16 of the housing land supply as set out above under the deliverable supply.

#### **Vacant Units**

3.10 The Council's housing trajectory and 5 year housing land supply does not include any allowance for vacant units brought back into use in accordance with

paragraph 30 of PPG on Housing Land Supply<sup>6</sup>, which cautions against this due to potential issues of double counting.

#### **Supporting Evidence**

- 3.11 All site specific information gathered by the Council to inform the build out and completions rates used is set out in Appendix 1 Housing Trajectory and Appendix 2 Housing Trajectory Evidence.
- 3.12 The data and methodology used to calculate the average build out rates for sites where no site specific information could be obtained is provided in Appendix 3 – Build Out Rates.

#### **Buffer**

- 3.13 Paragraph 74 of the NPPF states that "the supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:
  - a) 5% to ensure choice and competition in the market for land; or
  - b) 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan40, to account for any fluctuations in the market during that year; or
  - c) 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply<sup>7</sup>".
- 3.14 The most recent Housing Delivery Test (HDT) result, published by the Department for Leveling Up, Housing and Communities (DLUHC) on 23 December 2023<sup>8</sup> (reflecting the three year period 2019/20 2021/22), showed that 90% of the Council's current housing requirement had been delivered over the three year period 2019/20 2021/22. The Council has therefore included a buffer of 5% in addition to the supply of deliverable sites within its 5 year

<sup>&</sup>lt;sup>6</sup> Planning Practice Guidance (PPG), Housing Land Supply, 05 February 2024.

<sup>&</sup>lt;sup>7</sup> **NPPF Footnote 41:** This will be measured against the Housing Delivery Test, where this indicates that delivery was below 85% of the housing requirement.

<sup>&</sup>lt;sup>8</sup> Housing Delivery Test: 2022 Measurement.

housing land supply calculation in accordance with the approach set out in paragraph 73 of the NPPF.

## **Past Under-delivery**

- 3.15 Paragraph 031 (Reference ID: 68-031-20190722) of the PPG on Housing Land Supply sets out that "under-delivery may need to be considered where the plan being prepared is part way through its proposed plan period, and delivery falls below the housing requirement level set out in the emerging relevant strategic policies for housing... The level of deficit or shortfall will need to be calculated from the base date of the adopted plan and should be added to the plan requirements for the next 5 year period (the Sedgefield approach), then the appropriate buffer should be applied".
- 3.16 Paragraph 031 (Reference ID: 68-031-20190722) of the PPG on Housing Land Supply establishes that step two of the standard method factors in past underdelivery as part of the affordability ratio, so there is no requirement to specifically address under-delivery separately when establishing the minimum annual local housing need figure through the standard method.
- 3.17 A shortfall in housing delivery against the proposed housing requirement in the Draft Plan and the standard method calculation of housing need has however been identified in the 2022/23 and 2023/24. As the Draft Local Plan was published in June 2022 it is part way through its proposed plan period, the Council has therefore added this shortfall to the housing requirements used for the 5 year housing land supply and has applied the 5% buffer to the combined total in accordance with paragraph 31 of the PPG on Housing Land Supply.

# **Small Site Non-implementation Rate**

- 3.18 A small site non-implementation rate of 10% is applied to the annual total supply of homes from minor development (less than 10 units). Whilst the NPPF and PPG do not require a non-implementation discount to be applied to a Local Authorities housing land supply, a 10% non-implementation rate applied to small sites (minor development) is widely used as a standard approach in the industry.
- 3.19 A non-implementation rate is not applied to medium and large sites as the best

available site specific information has been used for these sites and applying a non-implementation rate to these could result in double discounting. In addition, the buffer applied through the 5 year housing land supply calculation is considered to provide an equivalent level of flexibility to that achieved through the use of a non-implementation rate for medium and large sites.

## **Windfall Allowance Methodology**

- 3.20 Windfall sites are defined in the Glossary of the NPPF (Annex 2) as "sites not specifically identified in the development plan", with paragraph 71 establishing that "where an allowance is to be made for windfall sites as part of anticipated supply, there should be compelling evidence that they will provide a reliable source of supply. Any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends".
- 3.21 EBC considers it has evidence to justify making an allowance for windfall sites delivering between 1 and 4 units based on historic delivery rates over the last 10 years. This evidence is set out in Table 1 below, which demonstrates that although the Council has seen a reduction in the number of units coming through in the last 2 years, overall the rate of windfall development in the Borough has been consistent over the last 10 years.
- 3.22 Garden land is a consistent source of sites for windfall development due to the relatively suburban nature of the Borough, with low density housing and larger gardens, which allows sites to accommodate additional homes. Prior notification completions are also a significant source of windfall development in the Borough.

| Monitoring Year | Windfall rate |
|-----------------|---------------|
| 2014/15         | 96            |
| 2015/16         | 78            |
| 2016/17         | 88            |

| 2017/18                                 | 73  |
|---|-----|
| 2018/19                                 | 149 |
| 2019/20                                 | 47  |
| 2020/21                                 | 84  |
| 2021/22                                 | 97  |
| 2022/23                                 | 66  |
| 2023/24                                 | 49  |
| Total                                   | 996 |
| Average last 10 yrs (2023/24 – 2014/15) | 83  |

**Table 1:** Number of net units delivered per monitoring year through small windfall sites of 1 to 4 units over the last 10 year 2014/15 to 2023/24.

- 3.23 The total number of units delivered on windfall sites of 1 to 4 units over the last 10 years between 2014/15 and 2023/24 is 996, equating to an average windfall rate of 83 units over the same 10 year period.
- 3.24 The small sites windfall allowance contributes to the Council's 5 year housing land supply and plan period housing trajectory years from year 4 (2028/29) of the 5 year supply. Windfall sites are not included as a source of housing supply in the first three years of the 5 year supply in order to avoid double counting.

# 4. Housing Trajectory

## **Assessment of Deliverable and Developable Supply**

4.1 Table 2 below provides a summary of the Council's housing supply across the Plan period from each source identified in the Section 3 – Methodology using a base date of 01 April 2024. A detailed site by site list of all developments contributing to each source of housing land supply, along with the evidence that supports the projected build out/completions rates is provided in Appendix 1 to 3.

| Source   | Net units |
|--|-----------|
| Sites with units under construction  | 763       |
| - Including site allocations that are under construction   |           |
| Sites with Planning Permissions Sites with (small sites of less than 10 units)                                 | 196       |
| - Including site allocations with Planning Permission  | (176)*    |
| * with 10% non-implementation discount applied as set out in   |           |
| Section 3 – Methodology. This figure is included in the total  |           |
| supply figure below.   |           |
| Sites with Planning Permissions (medium and large site of 10   | 511       |
| or more units)   |           |
| - Including site allocations with Planning Permission  |           |
| Sites with a Resolution to grant   | 426       |
| Site allocations <sup>9</sup>  | 1,804     |
| <ul> <li>Not including site allocations that are under construction<br/>or have Planning Permission</li> </ul> |           |
| Windfall allowance <sup>10</sup>   | 1,075     |

<sup>&</sup>lt;sup>9</sup> Site allocations with planning permission or under construction are included within the under construction and planning permission components of supply to ensure there is no double counting. <sup>10</sup> The windfall allowance component of supply begins contributing to the Council's housing land

## **Trajectory**

#### **Draft Local Plan Housing Requirement**

4.3 Figure 1 below sets out the Council's projected housing trajectory over the plan period of the Draft Plan 2022/23 – 2039/40 against the proposed housing requirement of 8,136 homes (452 dpa).

Figure 1: Housing trajectory 2022/23 – 2039/40 against Draft Local Plan housing requirement.

4.4 Figure 1 shows a year on year shortfall in housing supply against the housing requirement proposed in the Draft Plan, giving a cumulative undersupply of 2,739 homes by the end of the plan period of the Draft Local Plan (2039/40) demonstrated by Table 5 below.

# Shortfall/Oversupply Against Local Plan Housing Requirement Trajectory

Table 4: Cumulative shortfall / oversupply against the housing requirement proposed in the Draft Local Plan.

#### Standard Method

4.5 As the Draft Local Plan was submitted in August 2023 the standard method calculation of housing need for the purposes of the Local Plan Examination is based on the household projections from 2023 to 2033 and 2022 affordability ratios. This position was agreed during the Examination hearing sessions in May 2024.

#### Step one

4.6 There are four steps to the standard method of calculating local housing need. Step one (setting a baseline) utilises sub-national household growth projections, specifically the 2014-based projections, to establish a baseline housing need figure, which is calculated by taking the average projected growth over a 10 year period from the current year.

| Component                       | Figure |
|---------------------------------|--------|
| a) 2014-based household         | 57,268 |
| projections for 2023            |        |
| b) 2014-based household         | 61,914 |
| projections for 2033            |        |
| c) Household growth between     | 4,664  |
| 2023 and 2033 (a – b)           |        |
| d) Average household growth per | 464.6  |
| annum between 2023 and          |        |
| 2033 (c / 10) <b>- baseline</b> |        |
| housing need figure             |        |

Table 5: Step one (setting the baseline) of the standard method calculation of local housing need.

#### Step two

4.7 Step two of the standard method (applying an adjustment to reflect affordability) applies an adjustment factor to the baseline housing need figure calculated through step one to take account of affordability using the most recent median workplace-based affordability ratios for the Borough. This generates the "uncapped housing need" figure. The affordability adjustment factor is calculated as follows:

$$Adjustment\ factor = \left(\frac{Local\ affordability\ ratio\ -4}{4}\right)x\ 0.25 + 1$$

Adjustment factor = 
$$(20.04 - 4/4) \times 0.25 + 1 = 2$$

| Component  | Figure |
|--|--------|
| e) Median workplace-based affordability ratio (2022) | 20.04  |
| f) Affordability adjustment factor                   | 2      |
| g) Uncapped local housing need (d x f)               | 929.2  |

**Table 6:** Step two (applying an affordability adjustment) of the standard method calculation of local housing need.

#### Step Three

- 4.8 In step three (applying a cap to the housing need figure) a cap is applied to the uncapped figure of housing need calculated through step one and two of the to ensure the level of housing need calculated is as deliverable as possible. The cap applied depends on the status of a Local Planning Authority (LPA) in the plan-making process.
- 4.9 Where an LPA's relevant strategic policies were adopted within the last 5 years the local housing need figure is capped at 40% above the average annual housing requirement figure set out in the existing policies. The same 40% cap also applies where the relevant strategic policies have been reviewed by the authority within the 5 year period and found to not require updating.
- 4.10 Where the relevant strategic policies for housing were adopted more than 5 years ago (at the point of making the calculation), the local housing need figure is again capped at 40% above whichever is the higher of:
  - The projected household growth for the area over the 10 year period

identified in step one; or

- The average annual housing requirement figure set out in the most recently adopted strategic polices (if a figure exists).
- 4.11 EBC's strategic housing policies were adopted more than 5 years ago in the Core Strategy. As such, the local housing need figure is capped at 40% above the baseline projected household growth.

| Component                     | Figure  |
|-------------------------------|---------|
| h) Capped adjustment factor   | 1.4     |
| i) Local housing need (d x h) | 650 dpa |

Table 7: Step three (applying a cap) of the standard method calculation local of housing need.

#### Step Four

4.12 Step four (cities and urban centers uplift) of the standard method involves applying an uplift 35% in locations that are within cities and urban centers. As Elmbridge is not within these designation step four does not apply in the Borough.

#### Standard Method Housing Requirement

- 4.13 Using the standard method calculation of local housing need gives a housing requirement of 11,700 homes (650 dpa) over the Plan period (2022/23 2039/40).
- 4.14 Figure 2 below sets out the Council's projected housing trajectory over the plan period of the Draft Plan 2022/23 2039/40 against the standard method calculation of housing need in the Borough.

Figure 2: Housing trajectory 2022/23 – 2039/40 against standard method calculation of housing need.

4.15 Figure 2 shows a year on year shortfall in housing supply against the standard method calculation of housing need, giving a cumulative undersupply of 6,303 homes by the end of the plan period of the Draft Local Plan (2039/40) demonstrated by Table 9 below.

# Cumulative Shortfall/Oversupply Against Standard Method Housing Requirement

 Table 8: Cumulative shortfall/oversupply against standard method housing requirement.

# 5. Five Year Housing Land Supply

## **Draft Local Plan Housing Requirement**

5.1 Table 9 below sets out the Council's 5 year housing land supply position against the housing requirement proposed in the Draft Local Plan. Again, a detailed site by site list of all developments contributing to each source of housing land supply and the Council's 5 year housing land supply, along with the evidence that supports the projected build out/completions rates is provided in Appendix 1 to 3.

|   | Source   | Net units |
|---|--|-----------|
|   | Housing requirement  |           |
| Α | Housing requirement per annum over plan period 2024/25 – 2039/40   | 452       |
| В | Total housing requirement over 5 year period 2024/25 – 2028/29   | 2,260     |
| С | Shortfall to 2024/25 (i.e. 2022/23 – 2023/24)  | 262       |
| D | Total housing requirement over 5 year period 2024/25 – 2028/29 including past under delivery [B+C]                           | 2,522     |
| E | 5% Buffer  | 126       |
| F | Total housing requirement over 5 year period 2024/25 – 2028/29 including past under delivery and 5% buffer [D+E]             | 2,648     |
| G | Annualised housing requirement over 5 year period 2024/25 – 2028/29 including past under delivery and 5% buffer <b>[F/5]</b> | 530       |
|   | Housing supply of deliverable sites  |           |
| Н | Under construction   | 763       |
| I | Planning permission (medium and large sites)   | 413       |
| J | Planning permission (small sites)  | 196       |

| K | 10% Non-implementation rate applied to small sites with               | 20      |
|---|---|---------|
|   | Planning Permission   |         |
| L | Planning Permission (small sites) minus non-implementation rate [J-K] | 176     |
| M | Resolution to Grant   | 404     |
| N | Site allocations  | 105     |
| 0 | Windfall allowance yrs 4 & 5 (i.e. 2027/28 & 2028/29)                 | 165     |
| Р | Total supply [H+I+L+M+N+O]  | 2,027   |
|   | 5 year housing land supply position                                   |         |
| Q | 5 year housing land supply [G/P]                                      | 3.8 yrs |

**Table 9:** Calculation of the Council's 5 year housing land supply position against the housing requirement proposed in the Draft Local Plan.

5.2 Table 9 shows that the Council can demonstrate 3.8 years of housing land supply against the 2,648 dwellings (530 dpa - 452 dpa, plus shortfall of 262 units from 2022/23 and 2023/24 and a 5% buffer) housing requirement proposed in the Draft Local Plan. As such, there is a shortfall of 1.2 years, equating to 621 units.

#### **Standard Method**

5.3 Table 10 below sets out the Council's 5 year housing land supply position against the standard method calculation of local housing need.

|   | Source   | Net units |
|---|--|-----------|
|   | Housing requirement  |           |
| Α | Housing requirement per annum over plan period 2045/25 – 2039/40 | 650       |
| В | Total housing requirement over 5 year period 2024/25 – 2028/29   | 3,250     |
| С | Shortfall to 2024/25 (i.e. 2022/23 – 2023/24)                    | 658       |

| D | Total housing requirement over 5 year period 2024/25 – 2028/29 including past under delivery [B+C]                           | 3,908   |
|---|--|---------|
| E | 5% Buffer  | 195     |
| F | Total housing requirement over 5 year period 2024/25 – 2028/29 including past under delivery and 5% buffer [D+E]             | 4,103   |
| G | Annualised housing requirement over 5 year period 2024/25 – 2028/29 including past under delivery and 5% buffer <b>[F/5]</b> | 821     |
|   | Housing supply of deliverable sites  |         |
| Н | Under construction   | 763     |
| I | Planning permission (medium and large sites)   | 413     |
| J | Planning permission (small sites)  | 196     |
| K | 10% Non-implementation rate applied to small sites with Planning Permission  | 20      |
| L | Planning Permission (small sites) minus non-implementation rate [J-K]  | 176     |
| M | Resolution to Grant  | 404     |
| N | Site allocations   | 105     |
| 0 | Windfall allowance yrs 4 & 5 (i.e. 2027/28 & 2028/29)  | 165     |
| Р | Total supply [H+I+L+M+N+O]   | 2,027   |
|   | 5 year housing land supply position  |         |
| Q | 5 year housing land supply [G/P]   | 2.4 yrs |

**Table 10:** Calculation of the Council's 5 year housing land supply position against the standard method housing requirement.

5.4 Table 10 shows that the Council can demonstrate 2.4 years of housing land supply against the 4,103 dwellings (821 dpa - 650 dpa plus 658 units shortfall from 2022/23 and 2023/24 and a 5% buffer) housing requirement calculated using the standard method. As such, there is a shortfall of 2.6 years, equating to 2,077 units.

# 6. Conclusion

#### **Draft Local Plan Housing Requirement**

- 6.1 Based on the evidence set out above, EBC is unable to demonstrate a 5 year supply of land for housing development when assessed against the housing requirement of 452 dpa proposed in the Draft Local Plan with shortfall in delivery from 2022/23 and 2023/24 and a 5% buffer included. This assessment indicates a 3.8 year housing land supply (a shortfall of 621 dwellings, equating to a 1.2 years supply of housing land).
- 6.2 The evidence also shows that the supply of homes in the Borough is expected to result in a cumulative shortfall of 2,739 units over the proposed plan period 2022/23 2039/40, when assessed against the proposed housing requirement.

#### **Standard Method Housing Requirement**

- 6.3 Similarly, the Council is unable to demonstrate a 5 year supply of land for housing development when assessed against the standard method housing requirement of 650 dpa with shortfall in delivery from 2022/23 and 2023/24 and a 5% buffer included. This assessment indicates a 2.4 year housing land supply (a shortfall of 2,077 dwellings, equating to 2.6 years supply of housing land).
- 6.4 The supply of homes in the Borough is expected to result in a cumulative shortfall of 6,303 units over the proposed plan period 2022/23 2039/40, when assessed against the standard method housing requirement.

# Appendix 1 – Housing Trajectory

1. The full housing trajectory is available as an Excel workbook on the Council's Local Plan Examination webpage <a href="here">here</a> (document ref. HOU018a).

#### Hi Paul

See below figures for the proposed housing delivery at Brooklands College, Weybridge – to caveat that this is a high level indication at the moment based on a mid-May 2024 start date and is subject to change as we review the detailed build programme. The below is based on calendar years.

2025 - 27

2026 - 160

2027 - 48

2028 - 71

2029 - 14

2-320

Kind Regards

Zahra

# Appendix 3 – Build Out Rates

# Small Sites of less than 10 units Average Build Out Rate

- 1. Historic completions data for all sites delivering net 1 to 9 units over the last 10 years (2023/24 2014/15) with reliable commencement and completion dates were used to calculate an average build out rates for sites delivering less than 10 units (minor development). A total of 384 records were used to produce an average time from decision to commencement and commencement to completion.
- 2. A summary of the average build out rates is set out in table 1 below:

| 1 to 9 units                 | Flats | Houses | Mixed | Average |
|------------------------------|-------|--------|-------|---------|
| Decision to start (yrs)      | 1.1   | 1.0    | 1.2   | 1       |
| Start to completion (yrs)    | 1.8   | 1.8    | 1.4   | 2       |
| Decision to completion (vrs) | 2.8   | 2.9    | 2.5   | 3       |

Table 1: Average build out rates for sites of 1 to 9 units.

3. The raw data used to produce the averages in table 2 is set out below:

Table 2: Sites that delivered net 1 to 9 units in Elmbridge over the last 10 years (2023/24 – 2014/15) with reliable commencement and completion dates.

## Sites of 10 to 49 units Average Build Out Rate

- 4. Historic completions data for all sites delivering net 10 to 49 units over the last 10 years (2023/24 2014/15) with reliable commencement and completion dates were used to calculate an average build out rates for sites delivering between 10 and 49 units (small scale major development). A total of 43 records were used to produce an average time from decision to commencement and commencement to completion.
- 5. A summary of the average build out rates is set out in table 3 below:

| 10 - 49 units             | Flats | Houses | Mixed | Average |
|---------------------------|-------|--------|-------|---------|
| Decision to start (yrs)   | 1.3   | 2.6    | 0.8   | 1.3     |
| Start to completion (yrs) | 2.2   | 7.8    | 1.7   | 2.3     |
| Decision to completion    |       |        |       |         |
| (yrs)                     | 3.2   | 5.0    | 2.2   | 3       |

Table 3: Average build out rates for sites of 10 to 49 units.

6. The raw data used to produce the averages in table 4 is set out below:
