

Climbing System with Slide

18
Play Features

The Junior Climbing Multi Play Unit serves as a dynamic centerpiece in Hurst Meadow Play Area. Crafted from durable Robinia wood, this versatile structure offers junior children a plethora of engaging activities that promote physical, cognitive, and social development. This unit is like 2 units joined into one. Children can scale the higher climbing net for a thrilling descent down the open slide, navigate their way over the spider net for a daring scramble to the bannister slide, or traverse the rope net for an adventurous journey across.
